

THE SAMZAR OCTOPUS

For My Home

A calm, step-by-step way to reduce household waste.

Reducing waste at home doesn't require perfection or big changes. The Octopus is a practical system that helps you separate waste calmly, reduce what you throw away, and reuse what you already have — one step at a time.

THE RHYTHM, EVERY TENTACLE

● Reduce → ● Separate → ● Store → ● Dispose less often

HOW IT WORKS AT HOME

You don't need to do everything

Waste is separated into eight simple streams, each following the same rhythm. Most homes start with just bags and food waste, then add more when it feels easy — you don't need perfection, only a place to start.

START SMALL

- One reusable bag
- One food-waste container

That's enough to start the Octopus.

MAKE IT EASY — A WEEKLY RHYTHM

With good separation, most waste can be stored safely and taken out just **once a week**:

One day for recycling

One day for plastics

One day for special items

Other days — low or zero waste

The Home version

1

Black Gold — Food Waste

Vegetable scraps, tea leaves, coffee grounds.

- Keep a kitchen container, then transfer to a sealed one
- Compost in a garden, rooftop or shared space

RESULT LESS SMELL, LESS WASTE, FREE SOIL

2

Reuse · Repair · Repurpose · Donate

Everyday items you can keep in use.

- Reusable fabric bags; refill jars instead of packaged goods
- Repair textiles; donate what you no longer need

RESULT FEWER BAGS, LESS CLUTTER, SMARTER HABITS

3

Recycling (Clean & Dry)

Paper, cardboard, glass, metals.

- Keep clean and dry
- Crush or flatten to save space

RESULT UP TO 80% VOLUME REDUCTION

4

Plastics We Can't Avoid (Yet)

Plastic packaging and bottles.

- Reduce where possible; separate PET bottles
- Use reusable bags whenever you can

RESULT BETTER HABITS OVER TIME

5

Wet Items That Don't Compost

Cooked food, meat, fish.

- Keep separate from compost
- Dispose carefully

RESULT CLEAN COMPOST, FEWER SMELLS

6

Items That Need Extra Care

Batteries, electronics, bulbs, medicines, oils.

- Store separately
- Dispose through appropriate channels

RESULT PROTECTS PEOPLE, SOIL AND WATER

7

Water Awareness

Daily water use.

- Reduce shower time; chemical-free cleaning
- Collect water for plants

RESULT SAVES WATER, SUPPORTS PLANTS

8

Energy Awareness

Electricity use.

- Switch off unused plugs; use LED bulbs
- Turn off lights when not needed

RESULT SAVES ENERGY, LOWERS COSTS
